Core Competencies

- **CNC milling with integrated robotics**
- **CNC turning**
- **Component assembly**
- **Fabrication and welding**
- **CAD design**

Differentiators

PRC is a valued supplier to OEMs, race teams and engine builders at the highest levels of motorsports such as NASCAR, INDYCAR, IMSA and World of Outlaws. Our years of experience in motorsports provides a unique perspective toward quality and innovative solutions. Applying these skills to design and/or manufacturing for any project allows PRC to improve quality and efficiency while meeting time-sensitive deadlines.

- **ISO 9001: 2015 certified for Design, Manufacturing and Assembly**
- **Component assembly**
- **CAD design**

Past Performance

Dry sump oil pump — PRC designed and manufactured a dry sump scavenge oil pump for a diesel engine mounted to a unmanned military tracked vehicle. The scavenge pump was necessary to provide constant oil supply to the engine during operations on rough terrain.

Dry sump oil pumps — PRC designs and manufactures oil pumps for the majority of NASCAR teams and many INDYCAR, IMSA, WOO sprint car and WOO late model teams.

Engine kits — PRC designs and manufactures engine kits for Chevy, Ford and Toyota sprint car engines. These kits include front drive covers, oil pumps, dry sumps, oil tanks and water pumps.
